

RWANDA INTEGRATED ELECTRONIC CASE MANAGEMENT SYSTEM (IECMS)

**The future is here!
Achieving Digital Integration**

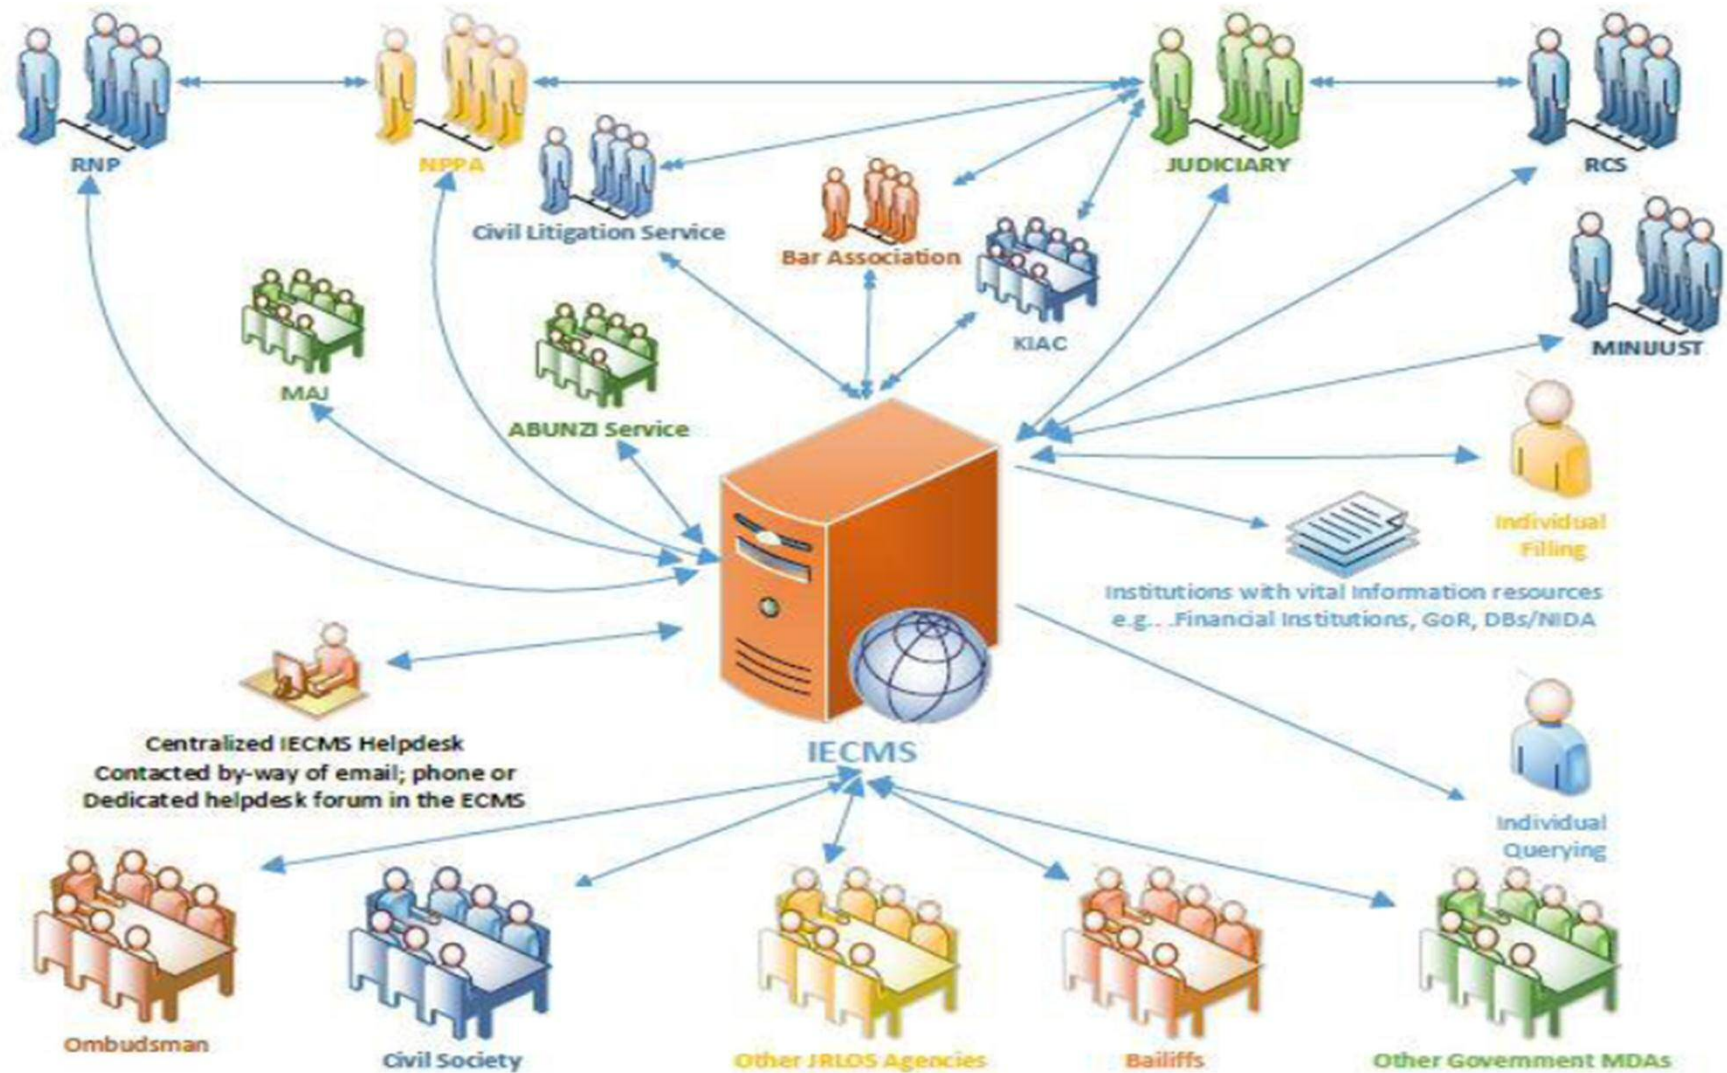

Introduction

IECMS was initiated to improve Judicial Service Delivery by reducing **delays and transaction costs** associated with judicial cases processing through the whole justice chain from the inception (beginning) of a case to its final adjudication (closing).

Summary

- ✓ The System is a web-based application (accessible from anywhere with internet connectivity)
- ✓ System Development Contract signed on 29th December 2014 between **Ministry of Justice** and American Company **Synergy International Systems**.
- ✓ Contract implementation is of **22 months period**:
 - 10 months period for system development (Jan –Oct 2015)
 - 12 Months period for support and maintenance (Nov 2015-Nov 2016)
- ✓ Contract amount: **1, 671,961.79 US\$ (~ 1,253,971,343 RWF)**

Summary

- ✓ IECMS development is completed and its deployment in Rwanda National Data Center done - Since November 2015.
- ✓ The Justice sector staff are trained to use and maintain the system
 - 8 IT staff followed a 7 weeks training in Armenia to maintain the system
 - 40 staff followed a 5 days training to administer the system
 - 40 staff followed a 5 days training of trainers to train other end-users
 - The training of end-users started within the City of Kigali and will continue countrywide in 2016.
- ✓ The use of the system starts in the City of Kigali in Jan. 2016

IECMS is a Sector wide tool enabling the Justice Sector to reach new levels of perfection:

- ✓ **Open Justice and open data**
 - Real time access to data
 - Automatic case archiving and tracking
 - Institutional Integration and coordination (RNP, NPPA, Judiciary, MINIJUST and RCS)
 - Integration with other Systems (NIDA, RRA and RNRA)
 - No duplication in data collection and processing
- ✓ **Transparency and Accountability**
 - Inter-institutional
 - Public
 - Judicial Sector and Officials performance monitoring

IECMS is a Sector wide tool enabling the Justice Sector to reach new levels of perfection:

✓ Speed

- Case forwarding and related information sharing on single click
- No double reproduction of work on paper and then on computer

✓ Saving Money

- Paper
- Transport
- Logistics

✓ Saving time

- Instant communication and collaboration
- Data referential, retrieval and sharing

IECMS is a Sector wide tool enabling the Justice Sector to reach new levels of perfection:

- ✓ **Business intelligence**
 - Integrated Data Management tool for data processing and analysis
- ✓ **Accuracy in Statistical Data and planning**
 - Real time (most up to date) statistics and reports generating
 - Effective decision making and planning
- ✓ **Accessibility**
 - Full time access to office work and documents for officials
 - Justice service accessible from anywhere to the citizen

Sustainable Development Goals (SDGs)

Goal 16:

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

Special achievement for Rwanda

- ✓ First and Unique Integrated Electronic Case Management System in Africa

System Upgrade Plan

The system will be upgrading to include these features:

- Electronic Signature and Stamping to make it fully paperless
- Finger print for easy identification of suspects

Thank you
